

To Whom It May Concern,

My name is Nicole LaBrecque and I am interested in running for President for the Society of Nuclear Medicine and Molecular Imaging New England Chapter Technologist Section. I am a graduate of MCPHS University and currently work as a Nuclear Medicine Technologist at Dana Farber Cancer Institute in Boston, Massachusetts. As a student, I attended the SNMMI-TS Leadership Academy, which sparked my initiative to become more involved with our local New England Chapter. I have held the position of Secretary on the NECTS Executive Board for the past two years. I have gained knowledge from this experience and hope to continue to be an asset to the chapter by running for President. I hope I can bring a new perspective to the chapter and provide insightful input on the needs of our chapter. Currently, I work to collect thoughts and opinions from colleges and peers, as well as students who are new to the field. I hope to enhance their experience with being members of the New England Chapter. I am very excited for an opportunity to serve as President and look forward to gaining more knowledge and experience through working with the NECTS Executive Board.

Sincerely,  
Nicole LaBrecque
